HELPFUL HINTS IN PRINTING YOUR MAGNETIC PAPER

Fan Sheets: to help eliminate any sticking between sheets.

Advance several sheets through press: to find any areas magnet may stick.

Potential Solution: tape aluminum plate over area (cut plate to fit on feeder on steel registration board).

If you have a double sheet detector: Mechanical double sheet detectors need to be set up for all paper. On some presses the electronic double sheet detector may have to be shut off.

Check blanket type: use of compressible style recommended.

Delivery area: more than usual spray powder recommended. However, make sure area is as clean as possible before printing.

More air on the slow down wheels: will help in the delivery.

Dryers: keep drying temperature under 120* F.

Feeder table wheels: need to be set light to reduce pressure.

Delivery area load: estimate weight limit.

Post printing operations: use smaller stacks if die cutting or trimming. Fan the sheets prior to packing. Take proper pre-press precautions—leave at least 1/8" between cuts.

Or, visit the Printers FAQ section at www.magnecote.com
